

Amendments to the Abstract

Please **add** the following Abstract to this application.

--The invention relates to a device for adjusting colour video signals, in particular the colour video signals produced by a film analyzer. The inventive device comprises a matrix which is flown by the colour video signals and makes it possible to regulate the components of three basic colours into colour video signals passing through the matrix. Said invention uses means for controlling the matrix with respect to hues which correspond to the colour video signals, respectively.--
